

E-COMMERCE SHOPPING WEBSITE

A MINI PROJECT REPORT

Submitted by

DHAIRYA AUNDHIA

92200103268

RISHI PATEL

92200103288

BACHELOR OF ENGINEERING

in

Computer Engineering

Marwadi University, Rajkot

[OCTOBER,2023]

Marwadi University
Rajkot

CERTIFICATE

This is to certify that the project report submitted along with the project entitled **E-commerce shopping website** has been carried out by **Dhairya Aundhia-92200103268** and **Rishi Patel -92200103288** under my guidance in partial fulfillment for the degree of Bachelor of Technology in Computer Engineering, 3rd Semester of Marwadi University, Rajkot during the academic year 2022-23.

Santushti Betgari

Internal Guide

Hardik Doshi

Head of the Department

Marwadi University
Rajkot

DECLARATION

We hereby declare that the Mini Project report submitted along with the Project entitled

E-commerce shopping website submitted in partial fulfilment for the degree of Bachelor of Technology in Computer Engineering to Marwadi University, Rajkot, is a bonafide record of original project work carried out by us at Marwadi University under the supervision of **Santushti Betgeri** and that no part of this report has been directly copied from any students' reports or taken from any other source, without providing due reference.

CHAPTER 1

OVERVIEW OF JAVA

1.1 Introduction of Java

UNIT-1 JDBC

- JDBC is used to connect java application with database.
- It provides classes and interface to connect or communicate java application with database.
- JDBC is an API used to communicate java application to database in database independent and platform independent manner.

UNIT-3 SERVLET

- Servlet technology is used to create web application.
- Servlet technology is robust and scalable because of java language.
- There are many interfaces and classes in servlet API such as SERVLET, GENERIC SERVLER ,HTTPSERVLET etc.

UNIT-4 JSP

- A JSP page consists of HTML tags and JSP tags.
- The JSP pages are easier to maintain and servlet because we can separate designing and development logic.
- JSP server side scripting language.

CHAPTER 2

OVERVIEW OF PROJECT

2.1 Introduction of LMS

We are using servlet instead of CGI .the basic benefits of servlet are as follows:

- Better performance because it creates a thread for each request not process.
- Portability because it uses java language
- Robust
- Secure

2.2 Drawbacks of Existing System

- Limited accessibility
- Time consuming
- Security concerns
- Limited scalability
- Inefficient customer service
- Lack of data analytics and reporting

2.3 Advantages of Proposed System

- **Enhanced Security**
- **Robust**
- **Dynamic**
- **Easy use and User Friendly**

2.4 Functional Requirements

Transaction management :

- Supports adding and removing items from carts.

Profile management:

Enables user to update and delete their account.

2.4.1 Technology

JAVA

My SQL

HTML

CSS

BootStrap

JDBC

SERVLET

JSP

2.4.2 Front End and Back End

Front end:

We are using HTML as our primary programming language for front end in our E-commerce Shopping website. HTML provides various tags and attributes such as video tag, SRC attribute, SVG, slider etc which helps us make our website responsive and interactive.

For styling we have used CSS and Bootstrap.

Back end:

We are using my SQL as DBMS for storing customer data, transaction records and other information by using JDBC.

We are also using Servlets and JSP.

CHAPTER 3

PROJECT SOURCE CODE

3.1 Function 1 Source Code

CHAPTER 5

CONCLUSION AND FUTURE ENHANCEMENTS

5.1 Conclusion

The e-commerce shopping website constructed with JSP, servlet, HTML, revolutionizes shopping websites with improved efficiency , security and customer services. It reduces time introducing real time updates and encryption for data security servlets platform independent capabilities ensure accessibility. While it may not have all the features of Shopping Website, though it has helped us with valuable learning experiences.

5.2 Future Enhancements

In future we will work on our security , time and database such that our user can interact with our website easily. Also with more technologies we will make our website more responsive and will add more features to our website.
